ASSIGNMENT 4:

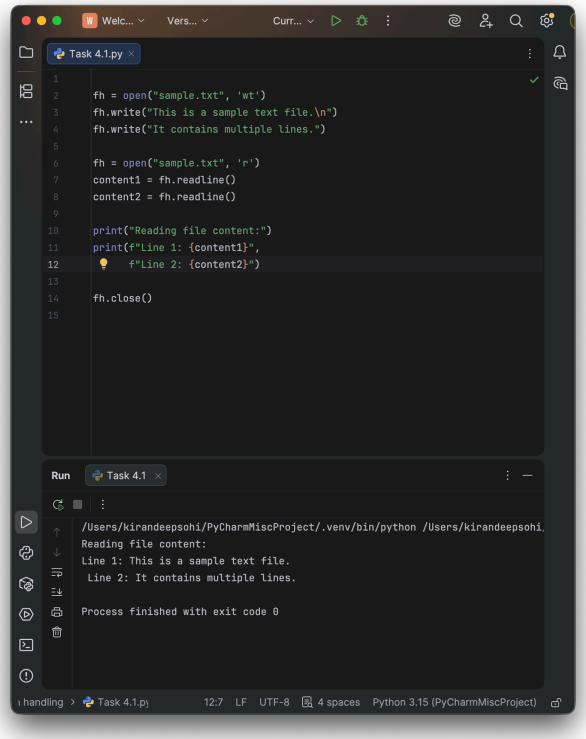

Module 5: Files, Exceptions, and Errors in Python

Task 4.1: Read a File and Handle Errors

Problem Statement: Write a Python program that:

1. Opens and reads a text file named sample.txt.
2. Prints its content line by line.
3. Handles errors gracefully if the file does not exist.

Output:

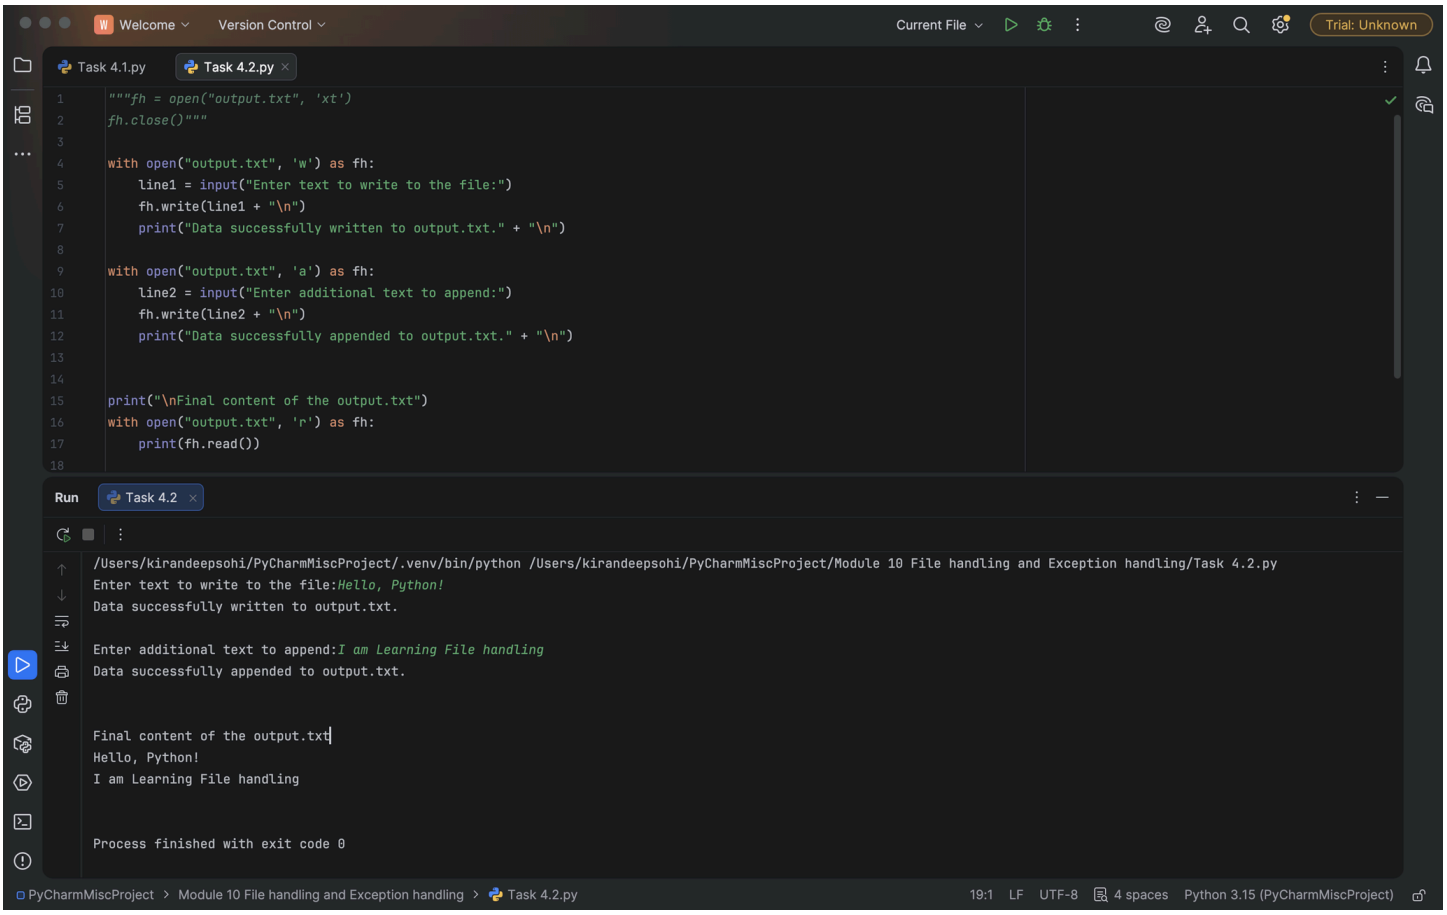

Task 4.2: Write and Append Data to a File

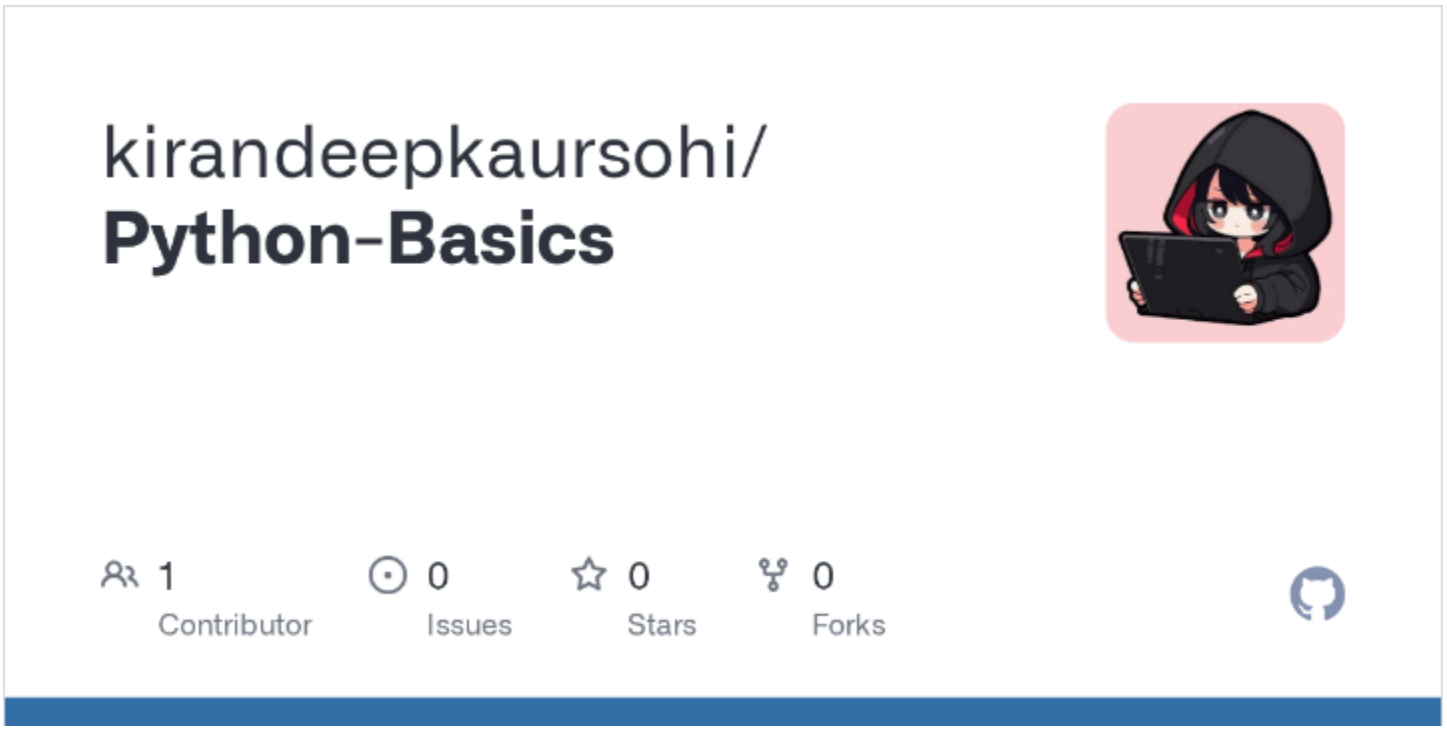

Problem Statement: Write a Python program that:

1. Takes user input and writes it to a file named output.txt.
2. Appends additional data to the same file.
3. Reads and displays the final content of the file.

Output:

Welcome
Version Control
Current File
Trial: Unknown
Task 4.1.py
Task 4.2.py
"""fh = open("output.txt", 'xt')
fh.close()"""
with open("output.txt", 'w') as fh:
line1 = input("Enter text to write to the file:")
fh.write(line1 + "\n")
print("Data successfully written to output.txt." + "\n")
with open("output.txt", 'a') as fh:
line2 = input("Enter additional text to append:")
fh.write(line2 + "\n")
print("Data successfully appended to output.txt." + "\n")
print("\nFinal content of the output.txt")
with open("output.txt", 'r') as fh:
print(fh.read())
Run
Task 4.2
/Users/kirandeepsohi/PyCharmMiscProject/.venv/bin/python /Users/kirandeepsohi/PyCharmMiscProject/Module 10 File handling and Exception handling/Task 4.2.py
Enter text to write to the file:Hello, Python!
Data successfully written to output.txt.
Enter additional text to append:I am Learning File handling
Data successfully appended to output.txt.
Final content of the output.txt
Hello, Python!
I am Learning File handling
Process finished with exit code 0
PyCharmMiscProject > Module 10 File handling and Exception handling > Task 4.2.py
